

Pippin and Wagsdale
in:
Gene Grabbing

Hey scrat! Pippin! Wagsdale! You boys are
just in time to witness my
latest scientific breakthrough!

I was able to successfully isolate the
genes of over 10,000 different species
and store them in these tiny test tubes

I have no idea what
you just said, but it
sounds cool!

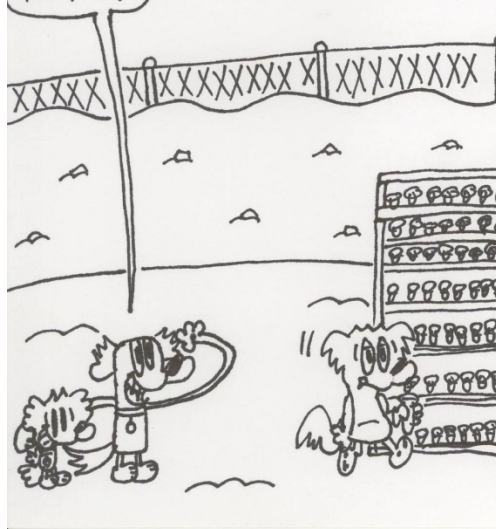

Well then, let me
demonstrate, this is a
dove gene.

I have to grab a few more
test tubes from the back, DON'T
touch anything while I'm gone.

Sure thing old buddy, old pal. We'll hold down
the fort!

I wonder what this one does.
Pippin!

you heard scrat, but that down!

Aw c'mon I'm just having
a little fun.
